Zatobox One

Zatobox one

Product configuration

The zatobox one has a rj45
connector which can be
connected to the p1 meter with
the adapter cable.

Specifications

Quick setup

First connect the zatobox one to power. This can be done through the p1 port or seperated charger via the side usb c port.

When it is powered up the LED should be flashing.

Now you can add the device through the app see: **[Add device](#):**

As standard for zatobox one it will have added two sensors for the main supply and gas supply.

LED State

Troubleshooting

Reset

To reset the wifi settings, you can push 10 seconds on the button. When succesfull the led should blink in pairing state.
